Alien scenerios were also used at times. These occurred with my parents and family friends. The sites included parks around the fingerlake areas of New York. The activities taken to monestarys, wineries, a cemetary, a church, a lighthouse and a farm. Programming, electrical shocking and experimentation was also part of the activities. The programming included angelic wars, dark and light and kabbala. The participants wore black hats and black suits. The women wore long bluish purple gowns. The activities took place up at the ends. We call them the dark people.
